About Me

Computer Engineering student and **Systems Development graduate** with experience in Software Quality Assurance (QA), process automation, requirements analysis, and software development. Worked on projects for medium and large enterprise clients, combining technology, quality, and continuous improvement. Also **completed a Game Development course** and continuously expand my knowledge through self-directed learning, currently focusing on **Unity** and **C#** to build 2D games and strengthen my software engineering skills.

Skills

- Advanced English
- Software Quality Assurance (QA)
- Software Testing (Functional & UAT)
- Test Planning & Execution
- Process Automation (UiPath & Python)
- Requirements Analysis
- Business Process Mapping
- Technical Documentation (PDD & SDD)
- Agile Scrum
- Stakeholder Communication
- Problem Solving

Formação

Bachelor's Degree in Computer Engineering

UNISAL – Campus Maria Auxiliadora

2025 - 2029

Pursuing a Bachelor's Degree in Computer Engineering with a focus on software development, software engineering, project management, and Agile methodologies. Participating as Project Lead in the Project Integrator, coordinating planning, documentation, and project delivery using Scrum practices. Developing expertise in software architecture, programming, and collaborative software development.

Technical Degree in Systems Development

ETEC Polivalente de Americana

2022 - 2024

Completed a Technical Degree in Systems Development with hands-on experience in web, desktop, and mobile application development. Worked with HTML, CSS, JavaScript, PHP, C#, Python, SQL, and Windows Forms while participating in software development and systems analysis projects.

Experience

Automation, QA & Business Process Intern

BITI9

2025 - 2026

Software Quality Assurance (QA)

- Led QA processes, ensuring software quality through structured testing strategies and acceptance criteria.
- Performed functional, regression, and user acceptance testing (UAT).
- Validated software releases, conducted reviews, and facilitated knowledge transfer sessions.
- Identified, documented, tracked, and verified defects throughout the software development lifecycle.
- Collaborated closely with developers, business analysts, and stakeholders to ensure high-quality deliverables.

Business Process Analysis

- Mapped and analyzed business processes for medium and large enterprise clients.
- Produced technical documentation, including Process Design Documents (PDDs), Solution Design Documents (SDDs), process flows, and technical specifications.
- Gathered business requirements and identified process improvement opportunities.

Automation Development

- Developed process automations using UiPath and Python.
- Supported implementation, testing, and validation of automated solutions.
- Assisted in optimizing operational workflows through automation initiatives.

Artificial Intelligence

- Designed AI-powered tools for automatic generation of technical documentation, process flowcharts, and acceptance criteria.
- Automated internal business processes using AI technologies to improve efficiency and standardization.

Stakeholder Communication

- Facilitated meetings with clients, business users, and cross-functional stakeholders.
- Delivered presentations, workshops, and knowledge-sharing sessions promoting software quality best practices.

Technologies

Programming Languages: C#, Python, C, JavaScript, PHP

Web Technologies: HTML, CSS

Tools: Visual Studio, Visual Studio Code, Git, UiPath, Microsoft Office

Quality Assurance: Functional Testing, User Acceptance Testing (UAT), Test Planning, Test Execution, Defect Reporting

Methodologies: Agile, Scrum
